

# Accuride®

PRECISION SLIDE PRODUCTS

*Smooth movement*

*Reduced noise*

*Increased durability and stability*

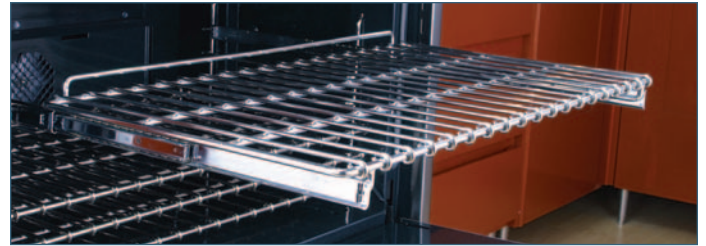

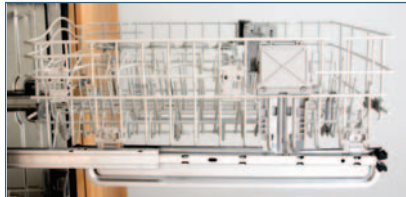

*engineered to meet your application demands*

# High or low temperatures, corrosion, or easy access, Accuride responds with designs that fit your requirements.

## Dishwashers

- 40 lb. load rating
- Tested to 100,000 cycles
- 4" over travel - racks extend fully past the countertop
- Drainage holes ensure water is not trapped within the slides
- Slides constructed of stainless steel material and corrosion-resistant polymers
- Withstands high temperatures to ensure sustained, smooth operation
- Does not impede racks offering vertical adjustment feature
- Racks disconnect to allow unit servicing

## Oven Rack System

- Complete assembly include racks, slides, and brackets for easy installation and removal
- Systems available for wire rack support or molded oven cavities
- An ideal point-of-purchase or after-market upgrade
- 40 lb. load rating handles heavy-duty requirements
- Tested to 35,000 cycles
- Full extension or over travel for full access
- Smooth and even ball bearing movement helps prevent spills
- Chrome plated steel components for an aesthetic finish that resists discoloration
- High temperature FDA grease
- Unit may be removed and repositioned
- Although removal of unit is recommended for self-cleaning, the assembly will withstand a limited number self-cleaning cycles. Relubrication will restore optimal performance
- Other finish options available

## Refrigerators/Freezers

### Crisper Drawers and Pull-out Shelves

- Accommodates a wide range of drawer/tray sizes
  - Tested to 150,000 cycles
  - Full extension for total access
- Comprised of corrosion-resistant polymers, stainless steel components, and a white electrocoat finish to resist moist environments
  - Disconnect feature allows for drawer removal

### Bottom-Mount Freezers

- 80–200 lb. load rating for heavy-duty performance
- Tested to 150,000 cycles
- Salt-spray testing to 96 hours
- Self-closing action ensures a good seal
- FDA grease for safe, smooth operation
- Full extension or over travel
- Slides disconnect to allow unit servicing

## Warming Drawers

- Full extension to 2" + over travel for full access
- Tested to up to 75,000 cycles
- Available finishes: Zinc, Black Zinc, Chrome, Nickel, Weather-resistant
- High temperature resistant plastic components
- Self-closing mechanism ensures drawers close completely
